

Materials for a Lantern

- Lantern Creatable LR0190
- Icicle Creatable LR0135
- 1 A4 sheet of Cardstock
- Double-sided tape
- Decoupage sheet VK9821
- 1 A4 sheet of Pergamano paper
- 1 fake tea light
- Different materials to pimp up your lantern

Method

Cut and Emboss with the Creatable four times the lantern. Stick double-sided tape on the inside of the doors of the four lanterns so every door is closed. Scan a picture of the Decoupage sheet and print it out four times. Crop it to the right size so they fit behind the doors and stick them on the double-sided tape on the inside. Now fold the top and bottom corners of each lantern to the inside. Place the lanterns next to each other and stick these folded corners together with some tape so you get a 4-sided lantern. Do this also with the tops of the four lanterns. Stick these together with some tape. Use the Icicle Creatable to cut out icicles and stick these to the bottom of the lantern like on the picture. Use other materials like ribbons, flowers or other dies to pimp up your lantern and place the fake tea light inside.
