

## *Pontura instructions:*

1. Open Pontura card.
2. Place card on Pontura frame, right side up.  
(The card is placed on the frame so the gauze has no contact with any surface).
3. Shake Pontura paint bottle well.
4. Hold bottle at about a 45 degree angle to the gauze. Squeeze bottle until paint forms a small bead and allow it to attach inside a hole in the gauze. (Best to practise first on a piece of card!)
5. Allow paint to harden and dry for several hours, depending on room temperature and humidity. Overnight drying is preferred. The beads will flatten out slightly when drying, this is normal.

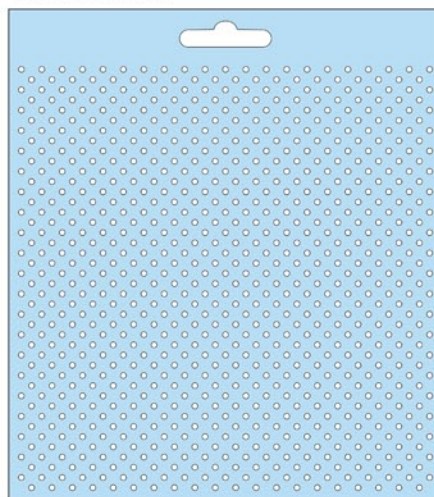

**Optional:** When using the Pontura stencils, many designs and patterns can be created. Place the stencil on plain card, and using the stencil as a guide, mark your own pattern with a pencil. Remove stencil. Use the pencil marks as a guide for the paint beads.
